

## Minden provides more...

We believe the Minden system to be the World's 'Finest' Dust Extraction System available on the market.

This is not a claim that Minden make without some foundation:

### DESIGN

Continuing evolution using 25 years product experience.

### ENGINEERING

Obtaining the best available components.

### SUPPORT

Planning & layout, installation and after sales service.

### WORLDWIDE

Through a network of distributors and agents.

## Minden Systems: manufactured by Minden.

### HIGH QUALITY CONSTRUCTION

For Reliability and a long service life.

### MONITORING OF SYSTEM

Pre and post filter vacuum gauges help ensure constant operation. Hour run time meter for energy and servicing control.

### LOW NOISE LEVEL

Quiet running (72dB or less) to give a comfortable and healthy work Environment.

### AUTOMATIC CLEANING

Independent automatic cleaning by compressed air ensures consistent performance during work.

### REMOTE SWITCHING

Minden's unique 12v remote controller allows convenient control of the plant by the operator, saving energy costs. Automatic switching with the tool is available as an option.

# Minden Dust Plants

“ Ranging in size with 3 to 24 workstations Minden centralised dust plants are powerful, reliable and easy to use, with minimal servicing required.”

All new EVOLUTION dust plants are ATEX upgradeable

## Powerful direct drive turbines for **FASTER WORKING**

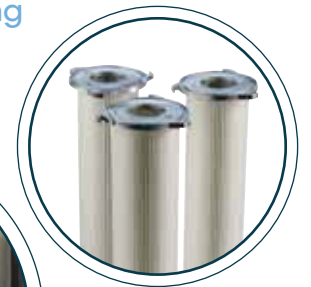

- Continuous vacuum power
- Long life 10 -15 years
- Performance monitored with vacuum gauges
- Hour run meter

## Reliable by design, **MINIMAL SERVICING** required

- Quality engineering and components
- Independent compressed air filter cleaning

## Economical with **ENERGY SAVING** remote switching

- Long Life filters (3 years / 5,000 hrs)
- More power per kw

# Minden Workstations

The **ENERGY MODULE** workstations are highly functional:

- Dust extraction, compressed air, electric and remote switching all built in.
- Giving easy access to each vehicle.
- Constructed from hard wearing lightweight aluminium, with components chosen for durability.
- A professional and functional addition to any workshop.

**STANDARD Workstations:**

- Provide dust & compressed air, suspended or fixed (wall mounted) basis.
- These workstations provide value for the specialised and smaller workshop.

**CUSTOM BUILT Workstations:**

- To customer specifications.

**SERVICE Modules:**

- For areas where only compressed air or electricity are required.
- Manufactured to customer specifications.

“ Minden workstations are compatible with all makes of tools. ”
